SKILLS

Languages:

JavaScript (ES6+), TypeScript, Python, C++ (DSA)

Frontend:

HTML5, CSS3, Tailwind CSS, React, Next.js, Redux, Webpack, Component Libraries / UI Frameworks

Backend:

Node.js, Express.js, NestJS, RESTful API Design, Authentication & Authorization

Databases:

MongoDB, PostgreSQL, DynamoDB

Cloud & DevOps:

AWS (EC2, S3, ECS, CloudWatch), Docker, Kubernetes (Basics)
CI/CD: GitHub Actions, Jenkins, CircleCI

Monitoring & Logging:

Prometheus, Grafana, ELK Stack / OpenSearch

Development Practices:

Agile (Scrum), Git, Code Reviews, MVC Architecture

EXPERIENCE

NEARLE TECHNOLOGIES — FULL STACK DEVELOPER

CLIENT: FRIENDBUY, USA — REFERRAL & LOYALTY SAAS PLATFORM

Jul 2025 – Present | India, Coimbatore

- Planned and enhanced scalable backend services using **Node.js** and **Express.js** for a US-based SaaS referral and loyalty platform.
- Executed **role-based access control (RBAC)** to securely manage permissions across admin, merchant, and internal user roles.
- Built a high-volume **CSV bulk rewards processing system** handling **1M+ records** with validation, asynchronous processing, and DynamoDB updates.
- Architected workloads to **auto-scale on AWS ECS**, ensuring reliability during heavy reward-processing traffic.
- Integrated **AWS DynamoDB, S3, and CloudWatch** for high-throughput data storage, file handling, and production monitoring.
- Engineered an **announcement and notification system** with scheduling, activation, dismissal controls, and analytics tracking.
- Leveraged **event-driven analytics** including impressions, clicks, CTR, and dismiss events.
- Utilized **Elasticsearch** and **Kibana** for centralized logging, observability, and debugging.
- Built modular, responsive UI components using **React.js, Redux, and Grommet**, delivering multiple product enhancements and production bug fixes.

DOTWORLD TECHNOLOGIES | FULL STACK DEVELOPER INTERN

Apr 2024 – Oct 2024 | India, Coimbatore

- Enhanced and optimized RESTful APIs using **Node.js** and **Express.js**, improving backend performance and scalability.
- Created and maintained **MongoDB** schemas with a focus on data integrity and query efficiency.
- Applied secure authentication and authorization workflows for protected application access.
- Built responsive **React.js** interfaces and integrated APIs for seamless frontend-backend data flow.

PROJECTS

FRIENDBUY — REFERRAL & LOYALTY SAAS PLATFORM

REACT, NODE.JS, DYNAMODB, ELASTICSEARCH/KIBANA, CLOUDWATCH, S3, CI/CD (CIRCLECI), AWS ECS (CONTAINER AUTOSCALING) | ENTERPRISE PROJECT

- Planned and executed scalable backend services for referral and loyalty workflows used by US enterprise clients.
- Built a high-volume CSV-based rewards processing system handling **1M+ records**.
- Applied role-based access control (RBAC) and secure API authorization.
- Enabled auto-scaling workloads using AWS ECS and monitored production systems via CloudWatch.
- Created analytics for impressions, clicks, CTR, and reward tracking.
